Government Performance Results Act (GPRA)

LEARNING OBJECTIVES:

Upon completion of this course, participants will be able to:

1. To know what GPRA is and why it is important.
2. To Understand the GPRA measures for dental.
3. To know how the IHS User Population is formulated for your program and its importance as it relates to GPRA.

Learning Objectives:

Most importantly:

Enjoy Yourself!

Additionally, some quizzes have been added to this presentation:

For Example, each equation contains initials for words that when completed make a correct statement.

Example: 26 = L of the A.

“26 Letters of the Alphabet!”

GPRA

GPRA and Other National Reporting

The Government Performance and Results Act (GPRA) requires Federal agencies to demonstrate that they are using their funds effectively toward meeting their missions. The law requires agencies to have both a 5-year Strategic Plan in place and to submit Annual Performance Plans describing specifically what the agency intends to accomplish toward those goals with their annual budget request. GPRA also requires agencies to have performance measures with specific annual targets. Every year, the Indian Health Service reports results for these GPRA performance measures.

GPRA measures for the IHS include clinical care performance measures, such as care for patients with diabetes, cancer screening, immunization, behavioral health screening, and other prevention measures. The agency also reports many non-clinical measures, including rates of hospital accreditation, injury prevention, and infrastructure improvements.

GPRA

What impact does GPRA have on my clinic?

GPRA has increased collaboration and understanding of public health and budgeting across the diverse IHS Stakeholders. GPRA is necessary for congressional budget approval and IHS does a good job at designing a strong annual plan supported by outcome data. This has the potential to give us an edge when competing for limited funds with other government agencies. Our annual funding is connected to the IHS GPRA performance. Even though GPRA is mandated by Congress, it reflects good public health practice. Achieving the GPRA objectives is in the best interest of your local program, whether IHS or Tribal, and the people you serve.

DENTAL

A continuing emphasis on community oral health promotion/disease prevention is essential in order to address the current high prevalence, reduce the severity of oral disease and improve the oral health of American Indian/Alaska Native (AI/AN) people.

The IHS dental health measures support Healthy People 2030 oral conditions objectives.

Access to dental services is a prerequisite for the control of oral disease in susceptible or high-risk populations.

Topical fluorides and dental sealants have been extensively researched and documented in the dental literature as safe and effective preventive interventions to reduce tooth decay.

GPRA: 2024 Status

Here is an update on the Government Performance and Results Act dental measures as of **April 15th**.

- *Tim Ricks, DMD, MPH, FICD, FACD, FPFA
RADM (Ret.), U.S. Public Health Service*

- **Access to dental care** is at **9.79%**, with the target being 24.40%. Last year at this time, access was at **9.55%**.
- The proportion of 2-15 year-olds with **dental sealants** is **4.86%**, with the target being 9.90%. Last year at this time, the dental sealant rate was at **4.63%**.
- The proportion of 1-15 year-olds receiving **topical fluorides** is **9.80%**, with the target being 21.10%. Last year at this time, the topical fluoride rate was at **9.82%**.

Clinical Reporting System (CRS)

CRS is the reporting tool used by the IHS Office of Planning and Evaluation to collect and report clinical performance results annually to HHS and to Congress. This site will serve as a central repository for information about the IHS Clinical Reporting System (BGP).

CRS is an RPMS (Resource and Patient Management System) software application designed for national reporting as well as local and Area monitoring of clinical performance measures. CRS produces on demand from local RPMS databases a printed or electronic report for any or all of over 300+ clinical performance measures, representing 68 clinical topics. CRS is intended to eliminate the need for manual chart audits for evaluating and reporting clinical measures that depend on RPMS data.

Each year, an updated version of CRS software is released to reflect changes in and additions to clinical performance measure definitions. Click on any of the software versions listed in the box at the left for detailed descriptions.

Performance measure example: GPRA Measure Mammogram Rates: Report the number of female patients ages 52 through 74 without a documented history of bilateral mastectomy or two separate unilateral mastectomies who had a mammogram documented during the past two years.

Current Status:

CRS 2024 Version 24.0 was released nationally on February 26, 2024.

2.2.1 Access to Dental Services

2.2.1.1 Owner and Contact

Dental Program: Timothy L. Ricks, DMD, MPH; Nathan P. Mork, DDS, MPH; Timothy L. Lozon, DDS; Joel C. Knutson, DDS

2.2.1.2 National Reporting

NATIONAL (included in National GPRC/GPRAMA Report; reported to OMB and Congress)

2.2.1.3 Denominators

1. GPRC: User Population patients. Broken down by age groups: 0 through 2, 3 through 5, 6 through 9, 10 through 12, 13 through 15, 16 through 21, 22 through 34, 35 through 44, 45 through 54, 55 through 74, and 75 and older.

2.2.1.4 Numerators

1. GPRC: Patients with documented dental visit during the Report Period.

Note: This numerator does *not* include refusals.

GPRO: CRS – Access to Dental Services (con't)

2.2.1.5 Definitions

Documented Dental Visit

Any of the following:

- IHS Dental Tracking code 0000 or 0190
- RPMS Dental codes/ADA CDT 0110 through 0390, 0415 through 0471, 0601 through 0603, 0999 through 9974, 9995, 9996, 9999, D0120 through D0389, D0415 through D0470, D0701 through D0804, D0999 through D9974, D9995, D9996, D9999
- CPT code D0110 through D0390, D0415 through D9952, D9970 through D9974, D9995, D9996, D9999 [BGP DENTAL VISIT CPT CODES]
- Exam 30
- POV ICD-10: Z01.20, Z01.21, Z13.84, Z29.3 [BGP DENTAL VISIT DXS]

2.2.1.6 GPRO 2024 Target

During GPRO Year 2024, achieve the target rate of 24.4% for the proportion of patients who receive dental services.

2.2.1.7 Patient List

List of patients with documented dental visit and date.

GPRA: CRS – Dental Sealants

2.2 Dental Group

2.2.2 Dental Sealants

2.2.2.1 Owner and Contact

Dental Program: Timothy L. Ricks, DMD, MPH; Nathan P. Mork, DDS, MPH; Timothy L. Lozon, DDS; Joel C. Knutson, DDS

2.2.2.2 National Reporting

NATIONAL (included in National GPRA/GPRAMA Report; reported to OMB and Congress)

2.2.2.3 Denominators

1. GPRA: **User Population patients ages 2 through 15 years**. Broken down by age groups: 2, 3 through 5, 6 through 9, 10 through 12, and 13 through 15.

2.2.2.4 Numerators

1. GPRA: Patients with at least one or more intact dental sealants.
2. Count only (no percentage comparison to denominator). For patients meeting the User Population definition, the total number of dental sealants during the Report Period. Broken down by age group 2 through 15.

Note: This numerator does *not* include refusals.

GPRA: CRS – Dental Sealants (con't)

2.2.2.5 Definitions

Intact Dental Sealant

- Any of the following documented during the Report Period:
 - RPMS Dental/ADA CDT codes 1351, 1352, 1353, D1351, D1352, D1353
 - CPT codes D1351, D1352, D1353
- *Or* any of the following documented during the past three years from the end of the Report Period:
 - IHS Dental Tracking code 0007

If both RPMS Dental/ADA CDT and CPT codes are found on the same visit, only the RPMS Dental/ADA CDT code will be counted. IHS Dental Tracking code 0007 will be counted regardless of whether another sealant code is submitted on the same visit or date of service.

For the count measure, only two sealants per tooth and only one repair (RPMS Dental/ADA CDT codes 1353, D1353 or CPT D1353) per tooth will be counted during the Report Period. Each tooth is identified by the data element Operative Site in RPMS.

2.2.2.6 GPRA 2024 Target

During GPRA Year 2024, achieve the target rate of 9.9% for the proportion of patients with at least one or more intact dental sealants.

2.2.2.7 Patient List

List of patients with intact dental sealants.

2.2.3.2 National Reporting

NATIONAL (included in National GPRC/GPRAMA Report; reported to OMB and Congress)

2.2.3.3 Denominators

1. GPRC: **User Population patients ages 1 through 15 years**. Broken down by age groups: 1 through 2, 3 through 5, 6 through 9, 10 through 12, and 13 through 15.

2.2.3.4 Numerators

1. GPRC: **Patients who received one or more topical fluoride applications during the Report Period.**

2. Count only (no percentage comparison to denominator). For patients meeting the User Population definition, the total number of patients with at least one topical fluoride treatment during the Report Period. Broken down by age group 1 through 15.

Note: This numerator does *not* include refusals.

3. Count only (no percentage comparison to denominator). For patients meeting the User Population definition, the total number of appropriate topical fluoride applications based on a maximum of four per patient per year.

GPR: CRS – Topical Fluoride (con't)

2.2.3.5 Definitions

Topical Fluoride Application

Defined as any of the following:

- RPMS Dental/ADA CDT codes 1201 (old code), 1203 (old code), 1204 (old code), 1205 (old code), 1206, 1208, 5986, D1206, D1208, D1354, D5986
- CPT codes D1201 (old code), D1203 (old code), D1204 (old code), D1205 (old code), D1206, D1208, D5986, 99188, 0792T [BGP CPT TOPICAL FLUORIDE]
- POV ICD-10: Z29.3 [BGP TOPICAL FLUORIDE DXS]

For the count measure, a maximum of one application per patient per visit is allowed. A maximum of four topical fluoride applications are allowed per patient per year for the applications measure.

2.2.3.6 GPR 2024 Target

During GPR Year 2024, achieve the target rate of 21.1% for the proportion of patients who received one or more topical fluoride applications.

2.2.3.7 Patient List

List of patients who received at least one topical fluoride application during Report Period.

GPRA

User Population:

Due to the Portland Area’s unique situation where most Tribal CHS(PRC)DA’s are overlapping, resulting in multiple counties being shared by two or more Tribes, UP is determined through a combination of both Tribal affiliation and workload

- Each Tribe receives **as part** of its total UP all of its own Tribal members who reside in its CHS(PRC)DA counties
- AI/AN who are not members of the Tribe(s) whose CHS(PRC)DA county they reside in are Unaffiliateds. These unaffiliateds are apportioned among the Tribe(s) whose CHS(PRC)DA includes that county, based on workload data accepted at the NDW

NW Band of Shoshoni	41	Yakama	11,227

-Table is reflective of Tribal Health Program and not historic Service Unit concept

-Per recommendation of Portland Area Fund Distribution Workgroup, the Portland Area Director has approved the following:

-Due to the Portland Area’s unique situation where most Tribal CHSDA’s are overlapping, resulting in multiple counties being shared by two or more Tribes, UP is determined through a combination of both Tribal affiliation and workload

- Each Tribe receives as part of its total UP all of its own Tribal members who reside in its CHSDA counties

-AI/AN who are not members of the Tribe(s) whose CHSDA county they reside in are Unaffiliateds. These unaffiliateds are apportioned among the Tribe(s) whose CHSDA includes that county, based on workload data accepted at the NDW

GPR: Strategies for Improvement

Dental GPR Objectives: Strategies for Improvement

- Build trust and relationships in the community. This will weave through all your work and improve your ability to get more tribal members to participate in your prevention program.
- Use dental staff to the full scope of their certification/license. For instance, establish an extra column in your appointment book for dental assistants to provide topical fluoride and dental sealants.
- Provide topical fluoride during all exam, cleaning and/or restorative appointments so to not miss the opportunity for patients to receive fluoride treatment, especially for those who are high risk for dental caries
- Provide dental sealants during exam, cleaning and/or restorative appointments to establish efficiencies in providing care while also meeting GPR objectives..
- Consider open access (walk-ins) for young children.
- Use code 0007 (has intact sealants but no new ones needed). This will give you “GPR credit” for this patient.
- Work with the medical staff to promote oral health evaluations with dental staff.
- Offer training to medical staff to “lift the lip” and in applying fluoride varnish when appropriate. Training may include recording the appropriate treatment codes. Follow up and refresher training may be required to sustain such programs.

GPRA: Strategies for Improvement (con't)

Dental GPRA Objectives: Strategies for Improvement

- Establish policy that well-child visits include a visit to the dental program for screening and topical fluoride.
- Use community newsletters and social media to promote prevention programs.
- Develop onsite Early Head Start, Head Start, and daycare programs to provide exams, topical fluoride, and sealants. (Use glass ionomer sealants for this age groups)
- Develop school-based fluoride and sealant programs. If you are unable to work with the schools, work with tribal after-school or summer recreation programs to reach children.
- Schedule “sealant days” or “health fairs” during school breaks or summer and encourage families to make appointments during these special days.
- Obtain data from your Electronic Dental Record (EDR) or work with someone at your facility who routinely deals with your RPMS data and request lists of children ages 2-15, or whatever ages you are most interested in. Send postcards or letters to the children’s homes, inviting them to the dental clinic.
- Offer incentive gifts or raffles for children who have their sealants completed.
